20.DisplayData

```java
class DisplayData
{
        static void display(String x)
        {
                System.out.println(x);
        }
        static void display(int x)
        {
                System.out.println(x);
        }
        static void display(Float x)
        {
                System.out.println(x);
        }
}
class main
{
        public static void main(String args[])
        {
        System.out.println("String:");
        DisplayData.display("Hello");
        System.out.println("Integer:");
        DisplayData.display(5);
        System.out.println("Float:");
        DisplayData.display(2.0f);
        }
}
```
